

While Alice was travelling through the Looking-glass, she had to get over six creeks. It's the amount of horizontals that are needed to be overcome by a pawn to become the Queen.

He invented a writing tablet called the nycetograph that allowed note-taking in the dark, thus eliminating the need to get out of bed and strike a light when one woke with an idea. The device consisted of a gridded card with sixteen squares and system of symbols representing an alphabet of Dodgson's design, using letter shapes similar to the Graffiti writing system on a Palm device.

Carroll's tales took the third place among the most cited books in English-speaking countries. The Bible took the first place, Shakespeare's works took the second place.

Lewis Carroll was living in Russia for a month. He was a deacon. It was that time when Orthodox and Anglican Church tried to establish strong contacts. He met with Metropolitan Filaret in Sergiyev Posad together with his theologian friend Liddon. In Russia, the writer visited Saint-Petersburg, Sergiyev Posad, Moscow and Nizhny Novgorod. After he told that the trip was exciting and informative.

Students considered their teacher Charles Dodgson (real name Carroll) the most boring lecturer in the world.
